CERTIFICATE OF PARTICIPATION

Learn to Optimise Your AI Stack

Ebenezer Rolston

took part in the live AI Realist workshop, delivered online on **30 July 2026** and comprising **3 hours** of instruction.

LEARNING OUTCOMES

- Read a consumption-priced AI bill and name what is actually driving the cost
- Move routine, deterministic work off the model and into code or a skill
- Cap an agentic loop before it runs the budget out unnoticed
- Design a golden-set evaluation to prove a cheaper pipeline still performs
- Judge how hard a task really is, and match it to the cheapest model that can do it
- Cut repeated input cost using prompt caching and context compaction
- Compare subscription, API and gateway options for a real team and quantify the saving

Maria Sukhareva

Workshop instructor

Certificate no. **AIS-2026-010**, issued **13 August 2026**. To verify, contact hello@airealist.org.

Issued by **AI Realist OOD**, UIC 208702317.

This is a record of participation. It is not a vocational qualification and not an accredited certification. It may be kept as evidence of a measure supporting AI literacy under Article 4 of Regulation (EU) 2024/1689, as amended by Regulation (EU) 2026/1744.
