RE: Business Process Technology Senior Analyst (Req ID: 117315)

Dear Hiring Team,

Thank you for considering my application for the Business Process Technology Senior Analyst role at the Black & Veatch Family of Companies.

I have 20 plus years of professional experience in solution building , translating business and operational needs into technology solutions, including enterprise data architectures, reporting dashboards, workflow automation, and process improvement.

As a Senior Analyst Lead supporting federal acquisition and financial operations, I led the Department of the Interior's FBMS data conversion across legacy databases, developed Core Financial Reports , Power BI and Tableau dashboards for contracting and financial reporting, and administered workflows and provided user training.

Earlier at Acxiom, I built identity solutions , served on the Acxiom Methodology Board, led cross-functional process improvements, designed Oracle data warehouses for financial-services clients, and developed predictive models to prevent fraud.

I recently completed a graduate certificate in AI Strategy at the University of Denver, focusing on technology roadmaps, ROI business cases, and workflow automation. I have also applied these skills through AI Guardians, my small business technology project.

As a Denver-area resident, I am available to work on-site in Greenwood Village.

I would welcome the opportunity to discuss how my experience in process improvement, data analysis, and user enablement could support Black & Veatch's priorities.

Thank you for your time and consideration.

Sincerely,

Ebenezer J. Rolston
