Ebenezer J. Rolston

BUSINESS PROCESS TECHNOLOGY SENIOR ANALYST | WORKFLOW & DATA AUTOMATION

Denver, CO • eberolston@yahoo.com • 501-307-3237 • **LinkedIn** • **AI Guardians**

PROFESSIONAL SUMMARY

Business Process Technology Senior Analyst with 20+ years translating operational requirements into scalable data, reporting, and workflow automation solutions across federal and commercial enterprises. Built Department-wide system data conversions, building Power BI and Tableau operational dashboards, and automating business workflows. SQL, Oracle PL/SQL, and ERP systems experience with a University of Denver Graduate Certificate in AI Strategy to design modern process improvements, evaluate emerging technologies, and deliver high-adoption user enablement.

- **Business Process & Requirements Translation:** 20+ years partnering with business stakeholders to map current-state workflows, define functional specifications, and implement technology solutions across legacy databases at DOI and Acxiom.
- **Reporting, Dashboards & Analytics:** Built Power BI reports on contracting status, obligations, and financials; Tableau Reports using enterprise ERP data sources; SQL and relational data modeling .
- **Workflow Automation & User Enablement :** Created browser-based automation tools on the AI Guardians portal; designed cohort training programs for 85+ users that measurably reduced recurring support tickets; evaluated RPA and AI tool adoption.

• Awards & Achievement : Interior Business Center Award for Excellence · DOI FBMS Special Recognition Award - Demonstration of Identity verification prototype to US Congress

CORE COMPETENCIES

Business Process & Solution Analysis: Requirements Elicitation • Process Workflow Reengineering • Functional Specifications • SDLC / Agile Delivery • Stakeholder Collaboration

Data Analytics & Enterprise Reporting: Power BI Reporting • Tableau Dashboards • SQL & Oracle PL/SQL • Relational Data Modeling • ETL Pipelines • Star Schema Warehousing

Technology Enablement & Modernization: DU AI Strategy Certificate • Emerging AI Evaluation & Roadmapping • User Training & Cohort Enablement (85+ Trained) • Remedy Incident Management

AI PROCESS AUTOMATION PORTFOLIO - Denver, CO | Sep 2025

• **AI Guardians** Process Planning Tools: Built browser-based planning tools including Use-Case Prioritization Canvas, AI ROI / Cost Estimator, and Vendor Evaluation Scorecard.

• **Enterprise Technology Roadmap:** Authored 3-year enterprise technology and AI strategy for Mile High Logistics covering maturity assessment, readiness analysis, budgeting, and ROI modeling.

• **Document Extraction & Automation MVP:** Built multimodal document processing and structured extraction workflow using Python, Pydantic schemas, and LangGraph conditional routing.

PROFESSIONAL EXPERIENCE

PROGRAM ANALYST, ACQUISITIONS DIRECTORATE | U.S. DEPARTMENT OF THE INTERIOR Denver, CO | Jan–Sep 2025

• Senior operational and functional lead analyzing business process workflows and translating policy needs into technical improvements in a highly regulated environment.

• Built Power BI reports tracking contracting status, invoices, obligations, and core financials, giving leadership clear visibility into operational performance.

- Business Incident Resolution between technical and business teams
- Delivered operational guidance and user enablement that drove system adoption.

Senior Analysis Consultant | Ark Solutions — Client : IBC Acquisition Directorate Denver, CO | 2011–2025

- Architected DOI FBMS enterprise data conversion as ETL Architect, for 12 bureau databases and translating them into integrated system workflows
- Developed and used Tableau dashboards connected directly to FBMS enterprise ERP data sources
- Delivered operational and cohort training for 85+ users, creating documentation and training materials that significantly reduced Remedy helpdesk tickets.
- Reclaimed $1M+ in recurring annual savings through contract funds deobligation, and performed funds realignment resolving complex financial discrepancies between contracting officials and vendors.
- Unison PRISM administrator for 7 years, managing user access, data integrit, and workflow administration.
- Tested robotic process automation (RPA) solution and SAP S/4 and PRISM system enhancements.
- Administered Invoice Payment approval workflow

Solution Developer & Architect| Acxiom Corporation - 2010

- Interviewed financial-services and insurance clients (Citibank, Allstate) to gather business requirements, analyze customer prospecting needs, and architect customized data solutions.
- Designed Oracle data warehouses, ETL data pipelines, relational data models, and star schemas behind multichannel marketing and fraud verification platforms.
- Standardized company-wide SDLC/SCM methodology as a process-improvement specialist on the Acxiom Methodology Board.
- Built Citibank's first Online Identity Scoring Model and directed senior developers in building and demonstrating the nation's first airline passenger-screening prototype to Congress.

EDUCATION & CREDENTIALS

Graduate Certificate, AI Strategy & Applications in IT : University of Denver

M.S. & B.S., Computer Science : St. Joseph's College

LLM & Agentic AI : Harvard School of Engineering and Applied Sciences

Machine Learning & Deep Learning : UC Berkeley

TECHNICAL PROFICIENCIES

Data & Reporting: Power BI, Tableau , SQL, Oracle PL/SQL, Excel (VLOOKUP, Macros)

Process & Automation: Requirements Gathering, Workflow Reengineering, SDLC, Agile/Scrum, RPA Testing, Streamlit, LangGraph

Enterprise Systems: SAP S/4HANA , Core Financials , Unison PRISM, Oracle DB, SQL Server, Remedy Incident Management

AI & Emerging Tech: Microsoft Copilot, Azure OpenAI APIs, RAG, Agentic AI, AI Maturity Roadmapping, LLM Risk Assessment
